DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-43, drawn to an apparatus and method for access control to a processor and computer-readable medium, classified in class 713, subclass 182.
 - II. Claims 44-56, drawn to an apparatus and method for sending and receiving data between a network and a host connected to a substrate and computer-readable medium, classified in class 726, subclass 9.
- 2. The inventions are distinct, each from the other because of the following reasons:

 Inventions I and II are related as combination and subcombination. Inventions in
 this relationship are distinct if it can be shown that (1) the combination as claimed does
 not require the particulars of the subcombination as claimed for patentability, and (2)
 that the subcombination has utility by itself or in other combinations (MPEP §
 806.05(c)). In the instant case, the combination as claimed does not require the
 particulars of the subcombination as claimed because for Invention II, any given access
 control between the host and substrate would allow the system to send and receive
 data between the host and the network. The subcombination has separate utility such

as Invention I could be used for access control to store and retrieve data on a computer-

Art Unit: 2137

readable medium between a stand-alone host, not connected to a network, and a substrate.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

- 3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Application/Control Number: 10/621,692 Page 4

Art Unit: 2137

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Pearson whose telephone number is (571) 272-0711. The examiner can normally be reached on Monday - Friday, 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel Moise can be reached on (571) 272-3865. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
